

DRIVE SAFE

This course will raise participants' driving skills, hazard response, knowledge of vehicle limitations and cultivate safe driving practices towards other road users. The course covers both classroom theory and in-vehicle practical sessions.

The aim of this course is to provide participants with an awareness of the actual and potential hazards associated with driving on varying road conditions. It also equips drivers with the necessary skills and techniques to recognize these hazards and the preventive measures to be taken.

REQUIREMENTS

- Valid Qualified Driving Licence
- Certified Doctor's Letter for applicants who are pregnant

COURSE FEE

S\$272.50 including GST
Duration: 200mins

DRIVER DEVELOPMENT TOOL

The Driver Development Tool is an effective tool to improve driver training, designed to assist in reducing the costs and risks associated with poor driving skills and behaviour.

The system uses advanced technology to gather, record and report on driver performance in a training situation, including both the initial training of new drivers and the retraining of experienced drivers.

Participants will each be allocated up to 40mins of practical driving along a designated route using the Driver Development Tool.

A Certificate of Attendance will be issued.

LESSON OVERVIEW

THEORY (CLASSROOM)

- How road accidents happen
- Common causes of road accidents and their consequences
- Main cause of driving errors – Decision Making – affected by driver's physical and mental conditions
- Other contributing factors that affect driving such as environment and vehicle's condition
- Vehicle Safety and Recovery Systems

PRACTICAL (ROAD)

- Action-Oriented Learning
- Experiential Learning – Participants will have a chance to observe and learn from other participant's driving
- Technology-Assisted Learning – Participants' driving performance will be reviewed through the Driver Development Tool
